

IN THE SPECIFICATION

Amend the header on every page as follows,

-- WO 03/075148 GN02031

PCT/EP03/50034 PATENT—

Page 1, amend line 5 as follows,

-- ~~{DESCRIPTION}~~ This application is a national stage filing of International Patent Application n. PCT/EP03/50034, filed February 27, 2003, which claims the benefit of Provisional Application no. 60/373,671 filed April 18, 2002 and European patent application no. 02100205.0 filed February 28, 2002. --

Page 1, amend the paragraph of lines 16-28 as follows.

-- In a pre-press workflow system, as disclosed e.g. in patent application WO 01/25907 herein incorporated by reference in its entirety for background information, jobs are processed, e.g. for commercial printing or for the packaging industry. In commercial printing, a job involves the processing of a specific set of document pages according to specified instructions. Most modern pre-press workflow systems are job ticket driven. Data processing activities are controlled by job tickets. A "job ticket" defines how a job is to be assembled and processed. It defines (for commercial printing) the pages that are to be assembled, it defines the processing features that are to be used (imposition, separation, trapping, overprinting, rasterization which is also called rendering, etc.), the output engine to which the rendered job will be sent. The job ticket editor allows the user to create and modify job tickets. --

Page 2, amend the paragraph of lines 11-15 as follows.

-- The present invention is a method for defining a job ticket in a pre-press workflow system ~~as claimed in independent claim 1~~. The invention also includes a system and a computer program for implementing the method. ~~Preferred embodiments of the invention are set out in the dependent claims.~~ --

Page 3, amend line 1 as follows.
